

Symantec™ Endpoint Protection Small Business Edition 12.1

Most effective, fastest protection designed for small businesses.

Overview

Keep your computers, employees, and data safe from cybercriminals with an effective antivirus, anti-malware solution that won't slow down your computers. Without the right solution, you may become the victim of cybercrimes and experience data loss and downtime. Unlike other more resource intensive, less effective antivirus or freeware software, Symantec Endpoint Protection Small Business Edition protects your computers and servers with the most effective antivirus, anti-malware technologies available.¹ It will not slow you down or swallow up system resources, so you can stay focused on growing your business.

What's New

Symantec Insight™

- Detects new and unknown threats that are missed by other approaches.
- Separates files at risk from those that are safe for faster and more accurate malware detection.
- Reduces scan overhead by as much as 70 percent by scanning only files at risk.
- Can't be evaded or coded around by mutated or encrypted malware.

Real Time SONAR – Examines programs as they run, identifying and stopping malicious behavior even for new and previously unknown threats.

Browser Protection – Scans for drive-by downloads and attacks directed at browser vulnerabilities.

Endpoint Protection for Mac OS X® – Now managed through the Endpoint Protection management console.

Smart scheduler – Stays out of your way by performing security tasks when your computer is idle.

“...new features offered in Symantec Endpoint Protection Small Business Edition 12.1 have enabled the Arc to save both time and money...”

- Linda Yurko, The Arc of Greensboro

1. AV-Test.org, “Real World Testing”, February 2011

Key Benefits

Fastest

- Recent third-party tests found Symantec Endpoint Protection Small Business Edition provided the best overall performance among similar solutions tested.²
- Separates safe files from those at risk for faster, fewer, smarter scans.
- Symantec Insight technology eliminates up to 70% of scan overhead for performance—so fast your users won't know it is there.³

Most Effective

- From the world leader in security—tracks security reputation of over 2 billion files from millions of users world-wide.
- Analyzes files and applications downloaded from the Internet, and lets you know if they can be trusted, before you install and run them.
- Identifies and stops new and zero-day threats before they can harm your computers.

Simple

- Deploys in just 20 minutes from start-to-finish for your entire network (on average in a less than 50 user environment).
- Save time with automated notifications and summary reports—no security expertise required.
- A single console to manage all computer security to reduce management costs and complexity.

"The best thing about Symantec Endpoint Protection Small Business Edition is that we don't even know it is there..."

- Paul Shager, Sea-Way Marin

Key Features

Proactive threat detection – Symantec Insight and SONAR technologies detect new and rapidly mutating malware stopping malicious behavior, including new and previously unknown threats.

Virus and spyware protection – Protects against viruses, worms, Trojans, spyware, bots, zero-day threats and root kits.

Network threat protection – Rules-based firewall engine, Browser Protection and Generic Exploit Blocking (GEB) shields systems from drive-by downloads and from network based attacks.

Single agent and management console – Centrally manages servers, PCs and Macs; consolidates antivirus, antispware, desktop firewall, and Intrusion Prevention on a single agent.
